

What is claimed is:

1. A method for manufacturing of comb-handle, comprising of the procedures of:
manufacturing procedure of the comb-handle core (10) by injection molding;
forming procedure of the pattern (20) on the surface of the comb-handle core

5 (10);

diluting procedure after putting a small amount of hardener and antifoam into
Formica;

manufacturing procedure of the comb-handle that is hardened and dried after
forming Formica layer (30) to the outer face of the comb-handle core (10) by fixing the
10 comb-handle core (10) to the inside of mold and then inputting the Formica dilute
solution;

milling processing procedure of the surface of the comb-handle (40); and
glossy processing procedure of the surface of the comb-handle (40).
